

Cloud Computing Communications

Dzmitry Kliazovich
University of Luxembourg

#1

ECO-CLOUD FNR Project

- Objective
 - Energy-efficient management of **communications in cloud computing**
 - Novel solutions in **(a)** network hardware (switches, routers and links), **(b)** data center communication systems, and **(c)** communication protocols.

- FNR funding 400K euro, started in June 2013

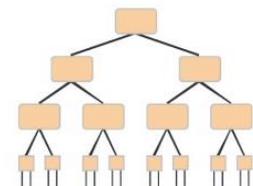

- Partners

- University of Luxembourg
- University of Sydney
- Tri-ICT

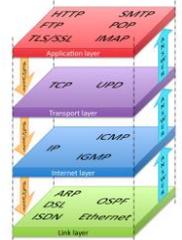

Objectives and Work Packages

- WP1: Energy-Efficient Metrics and Network Traffic Analysis
- WP2: Energy-Efficient Network Hardware
 - Energy proportional architectures for network switches
 - Integration of network hardware and communication protocols
- WP3: Energy-Efficient Data Center Communication System
 - Communication-aware models of cloud computing systems
 - Energy-efficient network-aware resource allocation
 - Multi-objective optimization

Objectives and Work Packages

- WP4: Energy-Efficient Communication Protocols
 - Energy efficiency of TCP/IP protocols
 - Energy-efficient protocol stack (ECO-stack)
- WP5: ECO-CLOUD Simulation Toolkit
 - ECO-CLOUD simulation toolkit software
 - Software prototypes and benchmarking results

#2

Greencloud - The green cloud simulator

Cloud Computing Simulator

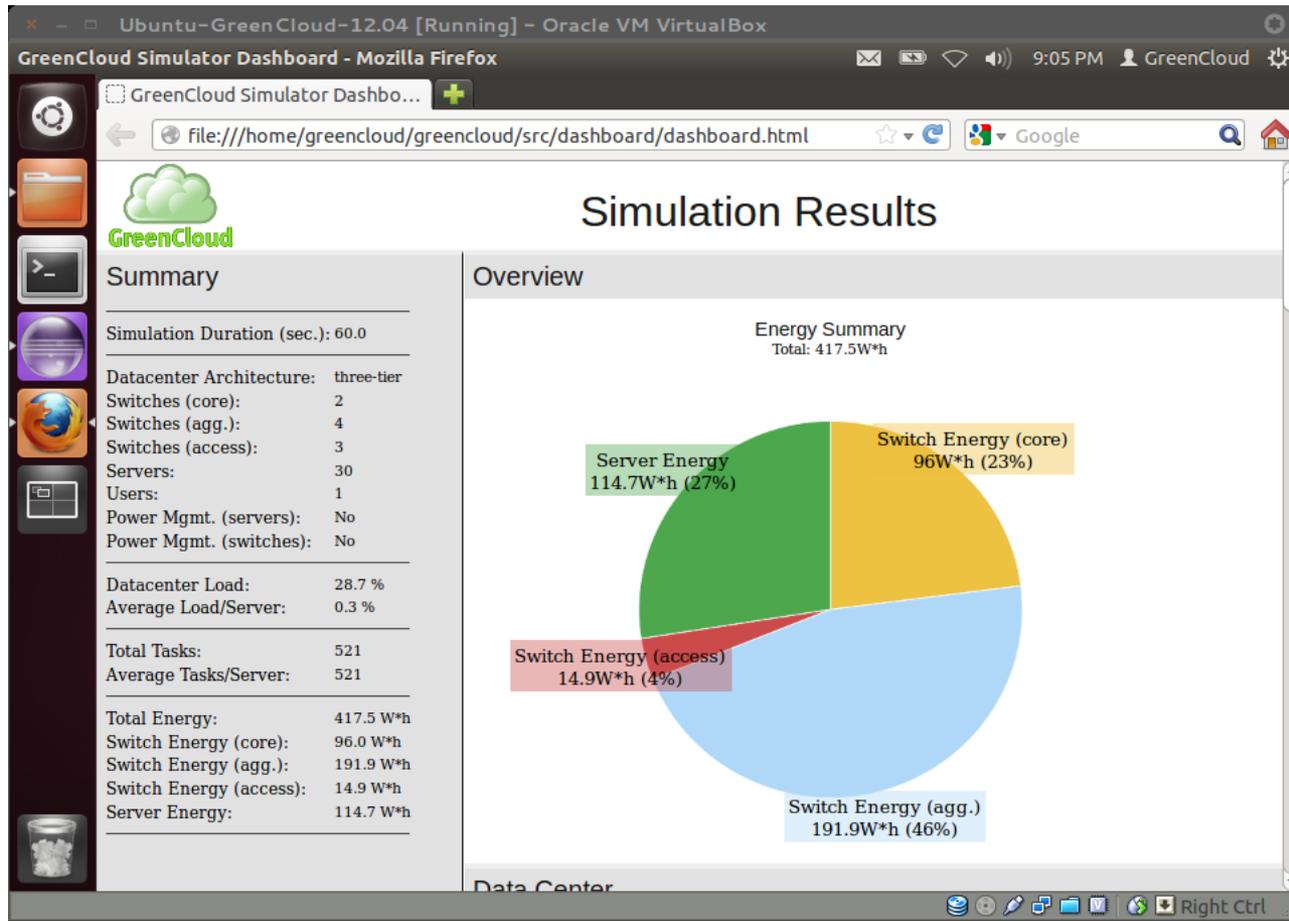

Simulating Energy-Efficient Clouds

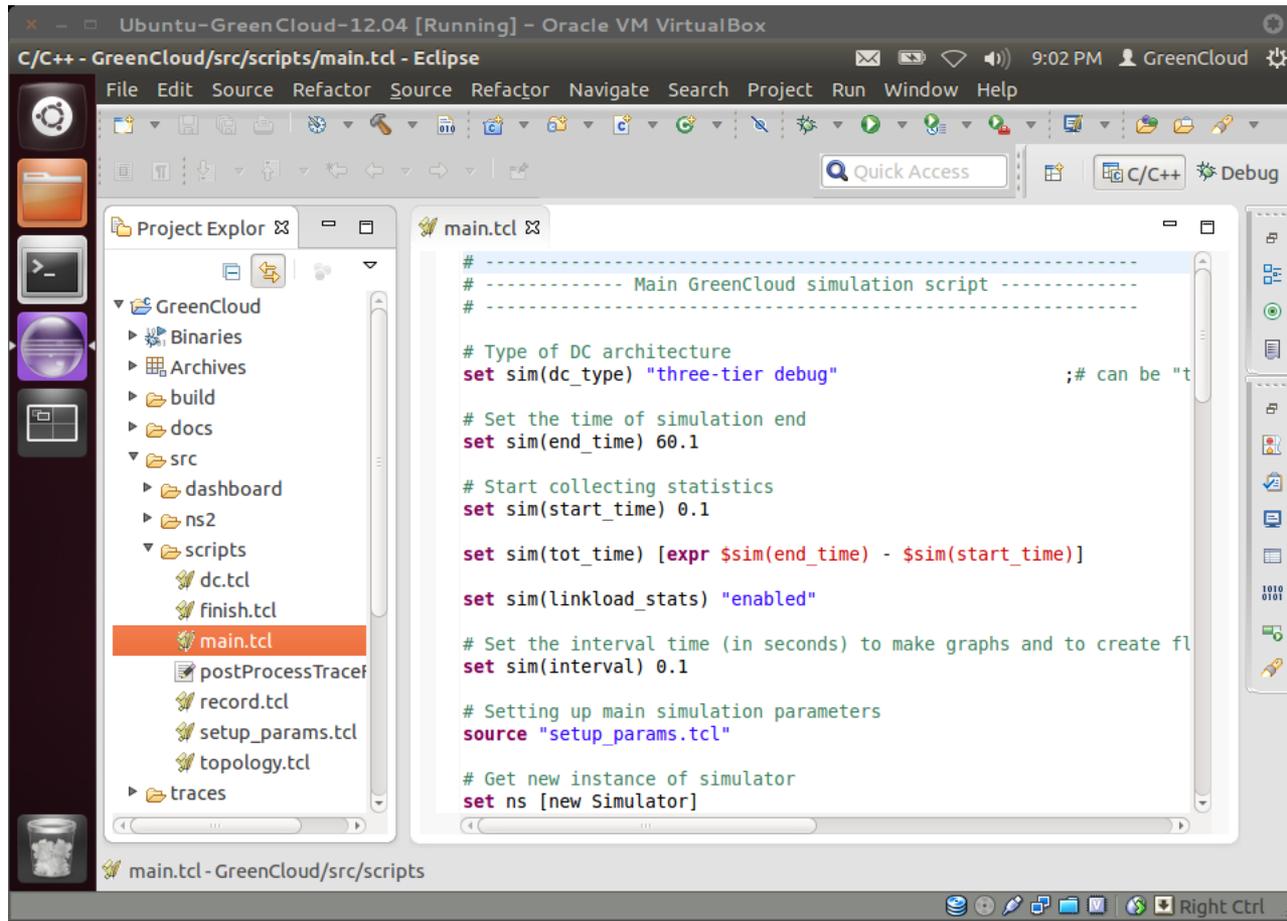

available at
<http://greencloud.gforge.uni.lu>

- Measures cloud performance and energy efficiency
- First to simulate cloud **communications with packet-level precision**
- Implements network-aware scheduling
- Implements complete TCP/IP protocol stack

GreenCloud: Screenshots

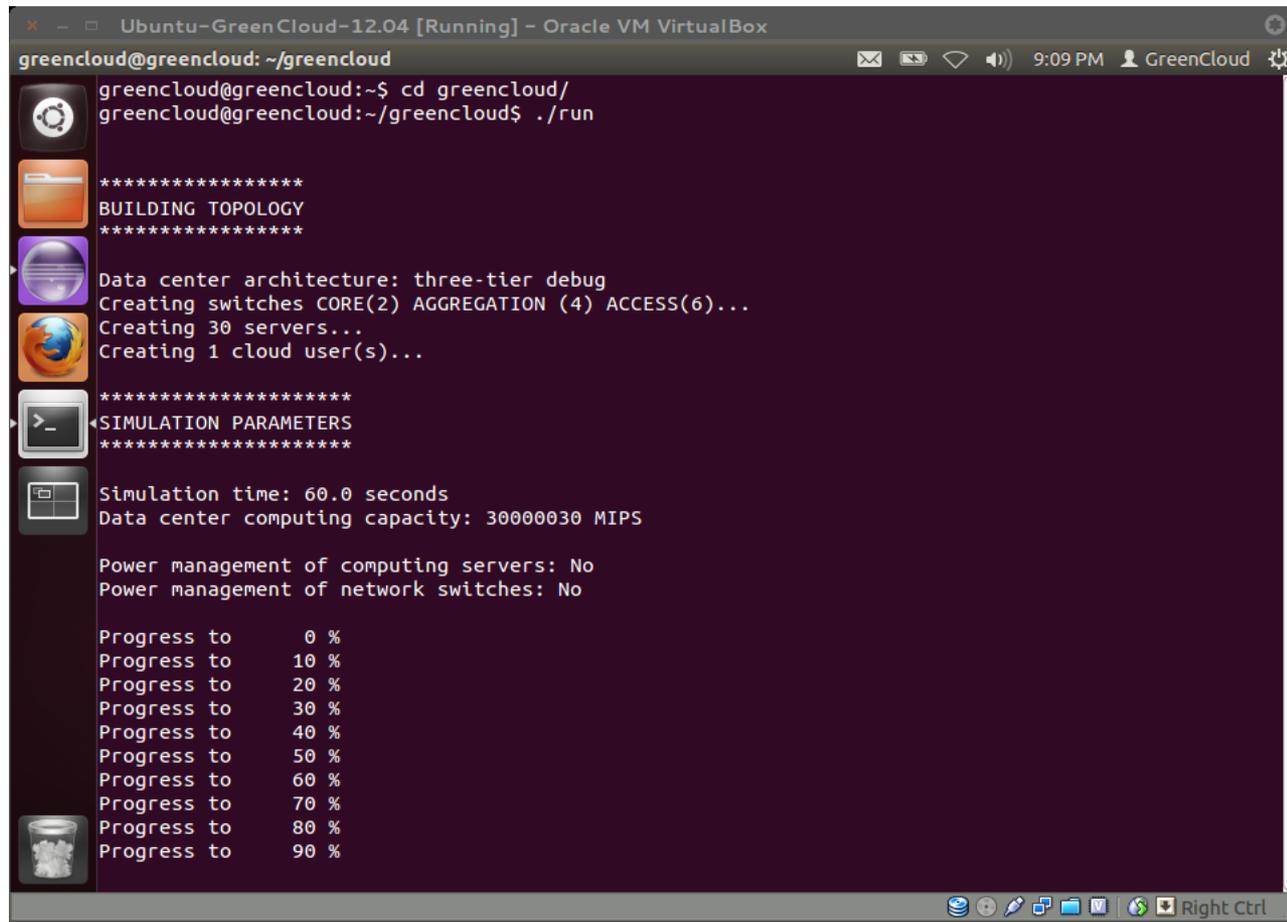

GreenCloud: Screenshots

The screenshot displays the Eclipse IDE interface within a VirtualBox environment. The title bar indicates the system is 'Ubuntu-GreenCloud-12.04 [Running] - Oracle VM VirtualBox'. The IDE window title is 'C/C++ - GreenCloud/src/scripts/main.tcl - Eclipse'. The menu bar includes File, Edit, Source, Refactor, Source, Refactor, Navigate, Search, Project, Run, Window, and Help. The toolbar contains various icons for file operations and development tools. The Project Explorer on the left shows the project structure: GreenCloud (containing Binaries, Archives, build, docs, src, and traces) and src (containing dashboard, ns2, and scripts). The scripts folder is expanded, showing files: dc.tcl, finish.tcl, main.tcl (selected), postProcessTracef, record.tcl, setup_params.tcl, and topology.tcl. The main editor window displays the content of main.tcl, which is a TCL script for a GreenCloud simulation. The script includes comments and configuration parameters such as simulation type, end time, start time, interval, and simulation parameters.

```
# ----- Main GreenCloud simulation script -----  
  
# Type of DC architecture  
set sim(dc_type) "three-tier debug"           ;# can be "t  
  
# Set the time of simulation end  
set sim(end_time) 60.1  
  
# Start collecting statistics  
set sim(start_time) 0.1  
  
set sim(tot_time) [expr $sim(end_time) - $sim(start_time)]  
  
set sim(linkload_stats) "enabled"  
  
# Set the interval time (in seconds) to make graphs and to create fl  
set sim(interval) 0.1  
  
# Setting up main simulation parameters  
source "setup_params.tcl"  
  
# Get new instance of simulator  
set ns [new Simulator]
```

#3

Third IEEE International Conference on Cloud Networking

Luxembourg • October 8-10, 2014

[HOME](#) [ABOUT](#) [COMMITTEE](#) [CALL FOR PAPERS](#) [REGISTRATION](#) [SPECIAL SESSIONS](#) [PROGRAM](#) [HOTEL&TRAVEL](#)

IEEE CloudNet'14 Topics:

- Data Center Network Management, Reliability, Optimization
- Distributed Data Center Architectures
- Internet Routing of Cloud data
- Green Data Centers and Cloud Networking
- Mobile Cloud Networking
- [More topics >>](#)

Important Dates

Paper Submission: **May 1, 2014**

Notification: **August 1, 2014**

Final Paper: **August 25, 2014**

Thank you!
